

GMQG..Mystery Quilt 2007 Part 3 The FINISH

Take the two small squares and slice them on the diagonal.

One at a time fold each side of the large square in half right sides together: fold each triangle of the small squares in half along the diagonal line you just cut. Fold it wrong sides together. You are finding the mid point of these pieces.

Lay the triangle on the large square and wiggle it so the folds snuggle together. Then pin carefully. Don't stretch the bias. Sew.

Do the other three sides the same way. And now your table topper is done.

This would look nice using the jelly rolls sold at the local shops.
